

IDEAS: HOW TO USE THE TOOLKIT

USING THE BULLY PROJECT TOOLKIT TO UPSKILL TEACHERS

Scenario: *New School* has written a bullying policy, but many of their teachers are new and haven't had much training or experience managing or implementing strategies to prevent bullying.

Actions: *New School* decide to use The BULLY Project Educator's DVD & Toolkit to run a training session for their teachers which included quizzing teachers on their knowledge of bullying, using the video and pdf resources to learn more about Social and Emotional Learning, and undertaking an exercise to review student connectedness at their school. They then used the Teacher Further Learning BULLY movie clips and discussion topics that have been mapped to AITSL standards and the National Safe Schools Framework to assess where they're at and what they can improve to create and maintain supportive and safe learning environments.

Outcome: The teachers at *New School* decided that they would undertake a school climate survey to gauge the whole school community's perception about the school culture, connectedness and learning environment. They intend to use this information to create an action plan of further training for teachers and new initiatives for students and parents.
